

Mystim e-stim aluminium dildos

Our line of aluminum dildos has something to suite everyone's taste: from delicate to daring, slim to stout, with profile, with rills, even with a handle – and their clear lines and carefully hand polished surfaces make our metal toys an entertaining and sightly addition to your nightstand.

Kinky tip: If you put any of our aluminum toys on the heater to warm them up, or in the freezer to turn them frosty, they will retain that temperature for quite a bit. See if you don't get some extra kick out of that!

100% medical grade aluminum

High quality material that ensures not only best electrical conduction but also non-allergic properties.

E-stim

Can be enjoyed purely or attached to an e-stim unit for an extra intense stimulation

Bi-polar toy

All dildos are already bi-polar and can conduct without having to attach an external electrode

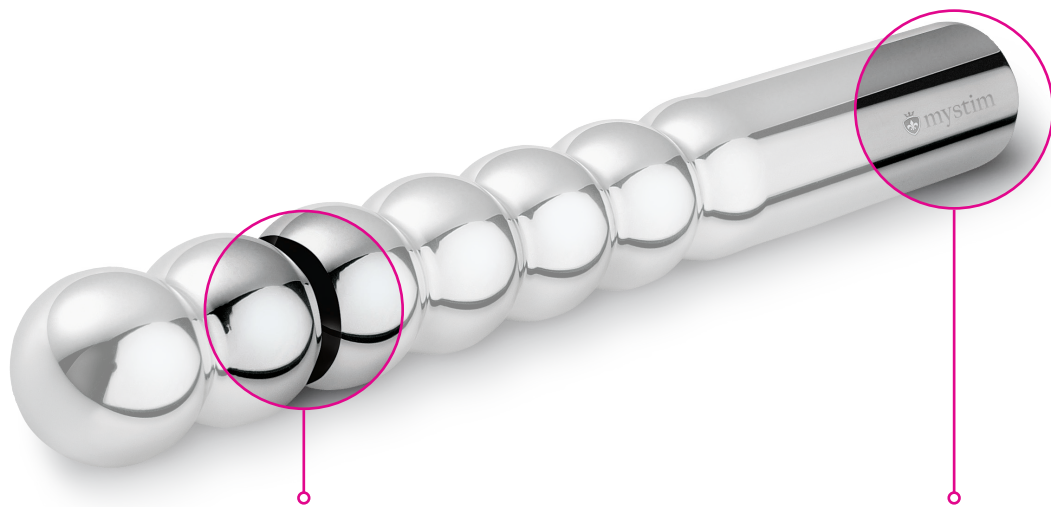

Handmade in Germany

All our metal dildos are made, polished, cleaned and checked by hand before they leave our workshop.

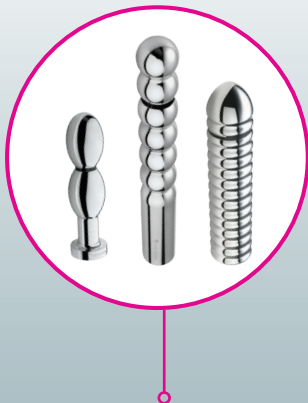

Electro stimulator box needed

In order to enjoy the endless tingles or strongly throbbing sensations of e-stim you need to attach these accessories to an e-stim box like our Cluster Buster or Tension Lover.

Separation of Poles
always bi-polar toys
